

LIST OF POSTERS

Modern technologies	P1	Katarina	Bačnik	Metagenomic analysis and infectivity of plant viruses in wastewaters
	P2	Katarina	Čufar	Alien Plant Species in the city – use of their wood for various products
	P3	Veno Jaša	Grujić	Establishment and characterization of biomass and astaxanthin content in the culture of alga <i>Haematococcus pluvialis</i>
	P4	Mojca	Juteršek	A novel plasmid for synthetic biology of cyanobacteria, tested with cystatin as a reporter
	P5	Valentina	Levak	Strategy for development of immune response biosensors in potato
	P6	Lucija	Luskar	Optimisation of CRISPR/Cas9 technology for gene editing in potato
	P7	Špela	Mestinšek Mubi	Micropropagation of medical cannabis (<i>Cannabis sativa</i> L.)
	P8	Sinja	Svetik	Towards first F1 hybrids of hemp (<i>Cannabis sativa</i> L.) - haploid induction by pollination with irradiated pollen
	P9	Dejan	Štebih	Digital PCR improves quantification of genetically modified organisms (GMO) in complex samples
	P10	Uroš	Žibrat	Hyperspectral remote sensing of drought in vineyards
Plant structure and function	P11	Erazem	Bahčič	Vegetative reproduction of selected invasive alien plant species
	P12	Mateja	Felicijan	Steps towards Revival of Moriculture in Slovenia – Biochemical Screening of Leaves of Centuries-Old Mulberry Varieties
	P13	Karina Eva	Hauer	Subcellular distribution of glutathione in wheat – a matter of light quantity and quality?
	P14	Zala	Krajšek	The impact of mowing on the growth and blooming of common ragweed (<i>Ambrosia artemisiifolia</i>)
	P15	Peter	Prislan	Monitoring of wood and phloem formation in beech and spruce
	P16	Marjana	Regvar	Scots pine (<i>Pinus sylvestris</i> L.) needles as a case study for element-specific tissue clustering
	P17	Jelka	Šuštar Vozlič	Isoflavone content of selected Slovenian red clover accessions
	P18	Dominika	Vašková	Flow cytometric seed screen in diploid species of the genus <i>Onosma</i>
	P19	Dominik	Vodnik	Photosynthetic traits of two <i>Canabis sativa</i> breeding lines

Plant phylogeny	P20	Tilen	Miklavčič	Liverworts from genus <i>Conocephalum</i> in Slovenia
Plants interactions with environment	P21	Maida	Jusovic	Salinity tolerance in a wheat mutant (Rht-B1c) with altered DELLA proteins
	P22	Vladislav	Kolarčik	Endopolyploidy analysis in seedlings of four crop species growing under exogenous application of phytohormone gibberellic acid
	P23	Eva	Kristkova	Elevational limits of <i>Lactuca serriola</i> L. and <i>L. virosa</i> L. in Central Chile
	P24	Ida	Linić	Response of the <i>Brassicaceae</i> seedlings on short-term salt stress and role of specialized metabolites
	P25	Marija	Mandušić	The influence of grafting on morphological properties of tomato
	P26	Jasna	Paradiž	New Advances in the Use of PGD Biomonitoring for <i>Galanthus nivalis</i> L. Cytogenome Diversity Assessment
	P27	Marko	Sabovljević	Uptake of heavy metals by the moss <i>Hypnum cupressiforme</i> from solid medium in controlled conditions
	P28	Marko	Sabovljević	Uptake of selected metals by mosses is affected by solution pH in the rain simulation controlled conditions
	P29	Aleš	Sedlar	Gene expression and proteolytic activity of endopeptidases and aminopeptidases in common bean (<i>Phaseolus vulgaris</i> L.) exposed to drought
	P30	Miha	Slapnik	Influence on sex expression of <i>Cannabis sativa</i> L. and its determination using DNA markers
	P31	Dunja	Šamec	Effects of low-temperature stress on specialized metabolites level in <i>Brassica oleracea</i> var. <i>acephala</i>
	P32	Milorad	Vujičić	Relation of long- and short-termed salt stress on pigment content in selected moss species
	P33	Gabriela	Vuletin Selak	Tomato grafting influences the ripening period and yield components
Plant interactions with other organisms	P34	Klemen	Dretnik	Identification of Avr effector of phytopathogenic fungus <i>Verticillium nonalfalfae</i>
	P35	Barbara	Dušak	The role of <i>StRbohA</i> and <i>StRbohD</i> genes in defence of potato against PVY virus
	P36	Maja	Križnik	Salicylic acid perturbs sRNA-gibberellin regulatory network in immune response of potato (<i>Solanum tuberosum</i> L.) to <i>Potato virus YNTN</i>
	P37	Denis	Kutnjak	Symptomatology, viral titer and virus populations' dynamics in experimental mixed infection of potato virus Y and pepino mosaic virus
	P38	Mateja	Potisek	Dark septate endophytic fungi affect the mineral nutrition and physiological state of goat willow (<i>Salix caprea</i>) in metal enriched soil
	P39	Tina	Unuk	Silver fir (<i>Abies alba</i> Mill.) phenology and fungal community structure in Slovenia
